To: FCC

**Subj: ET Docket No 14-37 (BPL - broadband over
power lines)**

FCC,

BPL has been tested in several other areas of the world with disastrous results of interference in the HighFrequency (HF) spectrum. Why beat a dead horse again here in the UnitedStates. Find another way to spread use of Inet links to homes. We already have enough interference (QRM) on our HF bands without one more cause from BPL.
